

# Nett Technologies' ARB Verified Emission Control Products

To standardize the quality of retrofit products and their claimed performance, the California Air Resources Board has established Product Verification Protocols for manufacture to adhere with. The list below provides the latest in retrofit product line offered by Nett Technologies. These products are offered in standard and custom fit design configurations. Extensive testing of each product line has been conducted to assure customer satisfaction not only from the noted performance aspects, but also for fit, installation time, appearance and OE specified exhaust back pressures and thermal engine compartment management limits.
