Nett Technologies' Super Hospital Plus Grade Silencers are designed to achieve maximum performance with the least amount of backpressure. The silencers are reactive and absorptive silencers which are typically used for reciprocating or positive displacement engines where noise level regulations are extreme.

FEATURES & BENEFITS

- Over 25 years of excellence in manufacturing noise and emission control solutions
- Compact modular designs providing ease of installations, less weight and less foot-print
- Responsive lead time for both standard and custom designs to meet your needs
- Customized engineered systems solutions to meet challenging integration and engine requirements

Contact Nett Technologies with your projects design requirements and specifications for optimized noise control solutions.
