

The Next Big Thing in Emission Control.

For use with small spark ignited (SSI) engines, the BlueCAT™ SSI emission control system is a direct-fit replacement for OEM mufflers.

Regardless if you're a worker, manager or a health and safety professional, the BlueCAT™ SSI is an emission control product designed to improve job site health and safety conditions.

Mindful of worker health and safety, the cost effective and easy to install BlueCAT™ SSI emission control solution is engineered and manufactured to integrate with all leading equipment and engine manufacturer designs.

Great at reducing harmful emissions, the BlueCAT™ SSI system is ideal for use in household and commercial applications, including lawn and garden equipment, utility vehicles, generators, and variety of other construction, farm, and industrial equipment.

Proven Technology

Reduces Carbon Monoxide (CO) by up to 98%, Oxides of Nitrogen (NOx) and Hydrocarbons (HC) by up to 95% using advanced catalyst technology.

Engine Type Versatility

Designed to operate on gasoline and gaseous (LPG & CNG) fueled Small Spark Ignited (SSI) engines.

Direct Fit

Replaces OEM muffler with the same envelope size. Retains key engine performance attributes: sound attenuation and back pressure.

Unique Design

Integrated catalyst design with a distinctive blue exterior heat shield and visible universal ANSI/ISO hot surface warning sign.

BlueCAT™

Small Engine three-way catalyst

Sold and supported globally, Nett Technologies Inc., develops and manufactures proprietary catalytic solutions that use the latest in diesel oxidation catalyst (DOC), diesel particulate filter (DPF), selective catalytic reduction (SCR), engine electronics, stationary engine silencer, exhaust system and exhaust gas dilution technologies. Our reliable and real-world emission solutions will extend the usable life of existing equipment while allowing you to avoid costly future replacements. We manufacture emission control solutions that are California Air Resources Board (ARB) and the U.S. Environmental Protection Agency (EPA) verified. As the emission control authority, we are here to help you navigate through the hassles and complexities of emission control compliance.

* Emissions performance may vary. Reference performance based on triplicate ISO 8178 D2 test cycles with engine operating in closed-loop configuration.

PRODUCT OVERVIEW

Nett Technologies' BlueCAT™ SSI engine emission control systems are designed as direct-fit replacements for OEM mufflers to the following engines:

Honda

- GX SERIES
- GXV SERIES

Kawasaki

- FS SERIES
- FX SERIES

Kohler

- CV SERIES
- CH SERIES

Briggs & Stratton

- VANGUARD SERIES
- VANGUARD COMMERCIAL SERIES

Other designs and engine models are available upon request.

HEALTH AND ENVIRONMENT BENEFITS

Typical BlueCAT™ SSI Engines Emissions Reduction Performance

* Emission performances may vary. Reported performance based upon surrogate test data. Engine operating with closed-loop fuel control at proper A/F ratio. System performance may vary based upon: performance and maintenance of the engine, fuel quality and type, duty cycle and exhaust temperature. Reference performance based on triplicate ISO 8178 D2 test cycles with engine operating in closed-loop configuration.

BlueCAT™ SSI muffler configurations samples:

V-Twin muffler configuration

Compact muffler configuration

Custom muffler design

Other configurations and designs are available. Contact sales for further details.
